- PBoC left its key lending rates unchanged for the sixth consecutive month in Apr-25 as they await to assess the evolving impact of the country's trade disputes with the US before introducing further stimulus. Global Bond Yields

- US Treasury prices ended marginally lower in April (Data till April 25, 2025) as worries of a fierce global trade war eased.
- The prices declined mainly after US Government paused the implementation of the reciprocal tariffs on all its trading partners, except China. Trump indicated a softening of his stance on tariffs.
- Moreover, stronger-than-expected inflation also put downward pressure on the prices. Another factor that contributed to the decline was news that US Trade Representative Jamieson Greer was tasked with leading the trade negotiations with Tokyo.
- Bond prices further weakened after Trump said he had no plans to fire Fed Chair
- However, earlier in the month, the prices had gained due to safe-haven demand as the US-China trade war intensified with both the countries announcing unprecedented retaliatory tariffs against each other, giving rise to global recession worries.
- Investors sought safe-haven assets as the US government's imposition of new import tariffs and their abrupt deferment gave rise to confusion, adding to the uncertainty for investors and policymakers around the world.
- Demand for bonds rose after the Fed officials hinted that they will await more data before adjusting interest rates and warned that Trump's tariff policies could push inflation and employment away from the bank's targets.
- Bond prices had earlier risen after feud between US Government and Fed officials

MARKET REVIEW

India Equity Market Performance

Index performance

Institutional flows

Source: NSE, BSE, SEBI, NSDL (data as of Apr 28, 2025)

*MF data as of April 24, 2025

- After having snapped a three-month losing streak to make a strong recovery in Mar-25, the Indian equity markets registered another month-on-month gain in Apr-25. Driven by a rally during the latter half of the month, with FIIs injecting about Rs 30,000 crore, mainly due to US dollar slipping to its lowest level in three years, easing concerns over US tariffs on China and some degree of revived optimism about India's macroeconomic fundamentals.
- Despite profit booking and geopolitical tensions between India and Pakistan heightening as the month drew to a close, the BSE Sensex gained 3.7% in value compared with Mar-25 end to close the month at 80,242 points, while the Nifty 50 gained 3.5% to close at 24,334 points.
- The market initially saw some losses due to global trade war fear and recession by reciprocal tariffs. However, these were gradually neutralised by growing hopes of minimal impact of the tariffs on India, given the progress in India-US trade talks. Positive manufacturing data also led to some gains.
- The markets gained steadily for seven trading days, tracking a rally in global markets following the US government's decision to provide a 90-day relief from reciprocal tariffs. Optimism was further fuelled by indications of US tariff exemptions and easing US-China trade tensions. Softening of dollar amid the US government displeasure over Fed's rate decisions, also benefited Indian bourses.
- Domestic market was supported by continued buying by DIIs. They bought Rs 222.5 billion worth of equities, compared with Rs 375.9 billion in Mar-25. Foreign institutional investors bought equities worth Rs 4.2 billion in Apr-25 following sales of 39.73 billion in Mar-25. Some gains arose from investors' response to robust corporate earnings, especially in banking stocks.
- All key sectoral indices, barring three, recorded month-on-month gains. The biggest gainer was BSE Bankex, which saw a 6.1% rise, riding on strong earnings from leading banks and expectations of an acceleration in credit growth amid supportive fiscal policies, followed by BSE Consumer Durables Index, gaining 5.9% on expectations of boost in consumer demand following interest rate cut.

Equity Market Outlook

Global Update: US equity markets were under pressure in Apr 2025 after President Trump's reciprocal tariff announcement on Liberation Day. However, stocks staged recovery and pared losses as Trump paused the tariffs for 90-days for all countries excluding China. The S&P 500 fell 0.8% while the Nasdaq 100 rose 1.5%, on-month in Apr 2025.

UK equities were also caught in the tariff-fear-driven selloff. Benchmark FTSE index fell 1.0% in Apr 2025. The European Stoxx600 index fell 1.2% in response to the tariff impact.

Japanese stocks were favoured again by investors due to return of inflation and shareholder-friendly reforms. The Nikkei 225 index rose 1.2% on-month in Apr 2025.

China equities fell in Apr 2025, impacted by the escalating tariff wars. The Shanghai Composite index fell 1.7% on-month in Apr 2025.

India Update: Foreign portfolio investor (FPI) sell-off trend fizzled out as investors became net buyers with purchases of Rs.4,223 crore in Apr 2025 compared to sale of Rs.3,973 crore in Mar 2025. (Source: NSDL)

Market barometers BSE Sensex and NSE Nifty50 rallied 3.7% and 3.5% on-month, respectively in Apr 2025. Sector-wise, BSE Consumer Durables (+5.7%), BSE Oil & Gas (+5.4%) and BSE FMCG (+5.2%) rallied the most, whereas, BSE Metals (-5.8%), BSE Infotech (-3.0%) and BSE Capital Goods (+0.1%) were laggards. (Source: BSE)

Our view going forward:

- We continue to believe in India's long-term structural story despite global uncertainties.
- The Union Budget 2025-26 has reaffirmed our view as it focuses on consumption revival, fiscal prudence, export promotion, tax rationalization and boosting domestic manufacturing.
- We believe the rejig in income tax slabs should help the middle class with additional disposable income.
- However, on the equity side, Large caps have suffered off late due to aggressive FPI selling, which makes them reasonably valued.
- We recommend investing in (a) Hybrid & Multi Asset allocation schemes and (b) staggered investment in large cap schemes or schemes with flexible investment mandate that can take high large cap exposure.

U.S. – United States of America; US Fed: Federal Reserve of US; FY: Financial year. FPI – Foreign Portfolio Investor.

Liquidity in the banking system

Source: RBI, Data as of April 27, 2025

- Interbank call money rates remained below the newly set repo rate of 6.0% during the latter half of Apr-25, with the WACR for the month coming in at around 5.96% (until April 28).
- Meanwhile, the RBI's policy rate cuts, coupled with positive foreign portfolio investments into the Indian debt market, pushed yields on 10-year benchmark government bonds to their lowest levels in over three years. Accordingly, the yields eased from 6.58% in March-end to 6.40% on April 28.
- Bond prices rose sharply at the start of the month ahead of the Apr-25 monetary policy meeting, following RBI's announcement of its decision to buy bonds worth Rs 80,000 crore in open market operation purchase auctions in four tranches. Rally in the prices was also brought about by expectations of monetary easing amid rising concerns over sweeping tariffs by the US and the possibility of a looming recession.
- RBI's announcement of a rate cut at its monetary policy meeting and the change in its stance from 'neutral' to 'accommodative' raised hopes for further rate cuts, thereby leading to a fall in the yields.
- As the month progressed, the central bank's infusion of liquidity into the system, softer-than-expected domestic inflation and strong demand for bonds ahead of the RBI's debt purchase kept bond prices high.
- Towards the end of Apr-25, expectations of a further infusion of liquidity by RBI and Indian geopolitical tensions also led to a rise in the prices.
- Further price gains were capped by profit booking across asset classes amid mounting global trade war concerns and intermittent spikes in US Treasury yields.

- Further gains were witnessed after the US president criticised the Fed. Intermittent weakness in the dollar index also kept gold prices elevated.

MARKET OUTLOOK

Fixed Income Outlook

Fixed Income Outlook

Fixed income market rally strengthened in April 2025 owing to cooling inflation, open market purchases by the central bank and loose liquidity conditions. Term premiums remained range bound owing to rate cut impact on short end yield curve being offset by fall in long-term bond yields.

Given the current growth-inflation dynamics, we expect the RBI to ease policy rates further and maintain sufficient surplus liquidity in the banking system to meet growth demands.

Given the trend in cooling yields, the 1- to 3-year corporate bond yield curve remains relatively attractive. Hence, we recommend schemes like low duration, ultra-short duration, money market, short duration, banking and PSU, corporate bond, dynamic bond and credit risk funds in this period.

Also, given the run-up in benchmark G-sec yields, we remain cautious on the 10-year over the medium term. This is because of impact of fiscal and likely monetary stimulus keeping economic growth in the mid-cycle. Also, global uncertainty may command a higher risk premium at some point of time.

Market Activity

The 10-year Indian benchmark bond yield fell ~22 bps during the month to 6.36% on Apr 30, 2025 from 6.58% on Mar 31, 2025.

Overnight rates hovered below the repo rate of 6.0% owing to surplus banking liquidity.

The 91-day T-bill yield fell 44 bps on-month to 5.90% whereas the 182-day T-bill fell 55 bps on-year to 5.92% owing to repo rate cut and surplus liquidity. (Source: CCIL)

ICICI Prudential Debt Valuation Index for Duration Risk Management

We believe that economic growth may continue to remain in the mid-cycle due to sustained capital expenditure by the Centre, rate cuts by the RBI, income tax concessions to the middle-class and easing of earlier imposed credit restriction norms. Also, given the run-up in the 10-year G-sec, we remain cautious on the 10-year over the medium term.

Our debt valuation index suggests maintaining a cautious stance on long duration. We attribute this to the ongoing growth phase of the business cycle. Also, global uncertainty may command a higher risk premium at some point of time.

Data as on March 31, 2025. Debt Valuation Index considers WPI, CPI, Sensex returns, Gold returns and Real estate returns over G-Sec yield, Current Account Balance, Fiscal Balance, Credit Growth and Crude Oil Movement and any other factor which the AMC may add / delete from time to time for calculation. Debt Valuations Index is a proprietary model of ICICI Prudential AMC Ltd (the AMC) used for assessing overall debt valuations. The AMC may also use this model for other facilities / features offered by the AMC. RBI – Reserve Bank of India.

Benefits of Systematic Investment Plan (SIP) - SIP Performance of Select Schemes

Returns shown for Growth Option as on 30 April 2025

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme.

The returns are calculated by XIRR approach assuming investment of Rs 10000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions.

Data as on April 30, 2025.

The Scheme offered is "oriented towards protection of capital" and "not with guaranteed returns".The orientation towards protection of the capital originates from the portfolio structure of the Scheme and not from any bank guarantee, insurance cover etc. The ability of the portfolio to meet capital protection on maturity to the investors can be impacted in certain circumstances including changes in government policies, interest rate movements in the market, credit defaults by bonds, expenses, reinvestment risk and risk associated with trading volumes, liquidity and settlement systems in equity and debt markets. Accordingly, investors may lose part or all of their investment (including original amount invested) in the Scheme. No guarantee or assurance, express or implied, is given that investors will receive the capital protected value at maturity or any other returns. Investors in the Scheme are not being offered any guaranteed / assured returns.

IDCW is gross IDCW. To arrive at the net IDCW payable for corporate and non-corporate investors applicable IDCW distribution tax, if any, needs to be adjusted respectively. Past performance may or may not be sustained in future. After payment of IDCW the NAV has fallen to the extent of payout and distribution taxes if applicable. For complete IDCW history details please refer to our website www.icicipruamc.com, Download section-NAV and IDCW history section.

Distribution of IDCW is subject to availability of distributable surplus and approval of Trustees.

When units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains is credited to an Equalization Reserve Account and which can be used to pay IDCW. IDCW can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

For information on Record Date for declaration of IDCW under various Schemes of the Fund with IDCW distribution frequency ranging from daily up to monthly distribution investors are requested to visit https://www.icicipruamc.com/docs/default-source/default-documentlibrary/icici_013_dividend-addendum_27-march-2021.pdf?sfvrsn=62de3112_0
