Global Bond Yields

- US Treasury prices ended higher in Jun-25 due to uncertainty around government's tariff policy and geopolitical tensions in the Middle East. The yield on the 10-year Treasury settled at 4.24% on June 30, 2025 compared to 4.41% on May 30, 2025.

- Bond prices rose further due to lingering concerns over economic growth triggered by escalating geopolitical tensions in Middle East.
- However, further fall in yield halted after U.S. government officials said that a ceasefire was in effect.
- It rose further after Fed officials repeated their expectation that policymakers are well positioned to wait before approving adjustments to the Fed's policy rate.

MARKET REVIEW

India Equity Market Performance

Index performance

Institutional flows

Source: NSE, BSE, SEBI, NSDL (data as of June 26, 2025). *MF data as of June 23, 2025

- Indian equities extended their winning run in June 2025, recording gains for fourth consecutive month, though global and geopolitical uncertainties clouded investor sentiment briefly. However, positive domestic cues, easing global trade concerns and a positive outlook spurred by policy support aided equities.
- Both benchmark indices scaled their highest levels in nearly nine months. BSE Sensex rose 2.6% compared with May-end to settle at 83,606 points, while the Nifty 50 gained 3.1% to close the month at 25,517 points.
- Equities rose after the RBI's MPC announced a larger-than-anticipated cut in the repo rate. MPC beat market expectations by slashing the repo rate by 50 basis points to 5.50%.
- Improved domestic cues, including inflation data, also aided investor sentiment during this period. Some support also came from the easing concerns pertaining to global trade.
- Further, DIIs picked up equities worth Rs 64,765 crore till June 26, compared with Rs 67,642 crore till May 30, 2025, which supported the market. FIIs sold equities worth Rs 14,590 crore in Jun-25, following buying of Rs 19,860 crore in May-25.
- Geopolitical uncertainties resulted in some degree of profit-booking. However, ceasefire announcement of Iran and Israel restored optimism. RBI's relaxation of project finance norms and easing inflation data also led to some gains.
- However, intermittent rise in global crude oil prices and a hawkish stance by Fed limited the gains in Indian equities. A fall in technology stocks amid uncertainty over global technology spending following weak earnings resulted in some losses towards the month-end.
- Gains in equities are broad-based with almost all key sectoral indices generating gains. BSE Realty index gained a 3.8%, primarily owing to the interest rate cut. BSE Teck index gained 4.7%, and BSE IT index, rose 3.3%. Both indices benefitted from optimism brought on by reports of government-led asset monetisation in telecom sector, a renewed focus on boosting competition, expectation of rate cuts by the US Fed and bargain hunting by investors.

Equity Market Outlook

Global Update: The rally in US stocks continued in June 2025 despite tensions in the Middle-east and the looming July 8 deadline of Trump's 90-day pause on reciprocal tariffs. The S&P 500 and Nasdaq reached record highs as hopes for trade deals and possible rate cuts eased investor uncertainty. During the month, the S&P 500 rallied 4.9% while the Nasdaq 100 rallied 6.3%.

In the UK, benchmark FTSE index ended 0.1% lower in June 2025 as market uncertainty prevailed and the new US-UK trade deal took effect. European benchmark Stoxx 600 index fell 1.3% in June 2025 as investors monitored for signs of any progress on U.S. trade talks as the July tariff deadline loomed large.

Japanese equities mirrored a rally in U.S. stocks, also supported by dividend pay-outs and corporate share buybacks in June 2025. The Nikkei 225 index jumped 6.2% on-month in June 2025.

China equities also managed to rise amid signs of recovery in manufacturing activity and home sales amid government efforts to shore up the economy. The Shanghai Composite index rose 2.9% in June 2025.

India Update: Stocks extended the winning streak in June 2025. Foreign investments sustained amidst easing global tensions, while large-cap banks and NBFCs attracted interest due to RBI's supportive measures. Foreign portfolio investors (FPI) bought net Rs. 14,590 crore in June 2025 compared to Rs.19,860 crore in Apr 2025. (Source: NSDL)

Market barometers BSE Sensex and NSE Nifty50 rallied 2.6% and 3.1% on-month, respectively in June 2025. Sector-wise, BSE Teck (+4.7%), BSE Healthcare (+3.9%) and BSE Realty (+3.8%) rallied the most, whereas, BSE FMCG (-0.3%), BSE Bankex (+1.6%) and BSE Capital Goods (+1.7%) were laggards. Our view going forward:

- Global macros at this point of time are more challenging which may impact global growth
- Contrary to this, India's fundamental attributes are robust and sustainable – Clean balance sheets, a structural increase in consumption, unwavering domestic demand, and fiscal prudence. Hence, long term structural story remains intact
- Recent RBI actions like liquidity injection; key policy rate cuts, large dividend to the Govt. are positive for India's business cycle and in-turn may result in India growth and corporate earnings to pick-up.
- So, investors with a long-term view can remain invested in equity markets
- However, due to high valuations the fresh investments should be done in a prudent manner.
- Mid-cap and Small-cap valuations continue to remain high.
- Also we believe at this point, middle of the road approach should be followed as most of the asset classes are fully valued
- Therefore, we recommend investing in (a) Hybrid & Multi Asset allocation schemes and (b) staggered investment in large cap schemes or schemes with flexible investment mandate that can take high large cap exposure.

Liquidity in the banking system

Source: RBI, Data as of June 30, 2025

- Ample liquidity conditions, coupled with the RBI's decision to slash policy rates in its Jun-25 Monetary Policy Committee meeting, pushed interbank call money rates to under 5.30% for a large part of the month. As a result, the weighted average call money rate for Jun-25 stood at around 5.40%, lower than the newly set repo rate of 5.50%.
- RBI's interest rate cut and shift in policy stance pushed Indian government bond yields to 6.30% levels soon after the June policy meeting. Thereafter, however, the yields saw very little change for the rest of the month. The yield on the new 10-year benchmark 06.33% GS 2035 paper eventually settled at 6.28% on June 26, 2025, as compared with 6.25% on May 26, 2025
- The higher-than-anticipated policy rate cut from the erstwhile 6.00% to 5.50% led to weakened demand for longer-tenure debt. This, coupled with the indications of limited policy space going forward, led to the cutting of positions by investors and the mounting of pressure on bond prices during the first half of the month.
- Weak demand for state debt at auctions and expectations of the reintroduction of variable reverse repo rate auctions to suck out surplus liquidity also kept bond prices under pressure.
- Bond yields were also sustained by an intermittent spike in crude oil prices amid the intensification of geopolitical conflicts in the Middle East.
- Nonetheless, the declaration of a ceasefire between Iran and Israel eventually led to a correction in oil prices and a recovery in bond prices. The RBI's announcement of liquidity absorption measures also led to some gains.
- Instances of short-covering at lower levels also provided some degree of support to bond prices.

MARKET OUTLOOK

Fixed Income Outlook

Fixed Income Outlook

In its June 2025 meeting, the RBI announced major monetary policy actions including shifting the 'accommodative' stance to 'neutral'. While the bumper rate cuts and CRR cut were positive for yields, the change in stance and latest growth print surpassing expectations meant that it was the end of road for further policy easing in this cycle.

We believe that economic growth may see a V-shaped recovery from its mid-cycle slowdown. This is due to recent policy measures like rate cuts, liquidity injections and relaxed regulatory oversight which is expected to move the economy back into the expansion phase of the cycle.

On monetary policy, the RBI has front-loaded the policy stimulus in order to push growth. Bond yields, too, have begun to correct its course and rise again. Therefore, we advise to be cautious on duration risks in fixed income portfolios.

We favor accruals in shorter-tenure corporate bonds up to 2 years. We suggest favoring a higher carry over higher duration in the current scenario. We recommend schemes like low duration, ultra-short duration, money market, short duration, banking and PSU, corporate bond, dynamic bond and credit risk funds in this period.

Market Activity

The 10-year Indian benchmark bond yield rose ~12 bps during the month to 6.32% on June 30, 2025 from 6.20% on May 31, 2025.

Overnight rates hovered below the repo rate of 5.5% owing to surplus banking liquidity.

The 91-day T-bill yield fell 21 bps on-month to 5.39% whereas the 182-day T-bill fell 10 bps on-year to 5.50% owing to surplus liquidity. (Source: CCIL)

ICICI Prudential Debt Valuation Index for Duration Risk Management

We believe that economic growth may continue to remain in the mid-cycle due to sustained capital expenditure by the Centre, rate cuts by the RBI, income tax concessions to the middle-class and easing of earlier imposed credit restriction norms. Given the shift in stance of the RBI and strong growth print in Q4FY25, we remain cautious on duration in fixed income portfolios.

Our debt valuation index suggests maintaining a cautious stance on long duration. We attribute this to the ongoing growth phase of the business cycle.

Data as on June 30, 2025. Debt Valuation Index considers WPI, CPI, Sensex returns, Gold returns and Real estate returns over G-Sec yield, Current Account Balance, Fiscal Balance, Credit Growth and Crude Oil Movement and any other factor which the AMC may add / delete from time to time for calculation. Debt Valuations Index is a proprietary model of ICICI Prudential AMC Ltd (the AMC) used for assessing overall debt valuations. Benefits of Systematic Investment Plan (SIP) - SIP Performance of Select Schemes

Returns shown for Growth Option as on 30 June 2025

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme.

The returns are calculated by XIRR approach assuming investment of Rs 10000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions.

Data as on June 30, 2025.
